

The Arctic Fox Natural Gas Pipeline

Project Supporters

While there is no doubt that getting Alaska's North Slope (ANS) natural gas to market is in the interest of all Alaskans, we can no longer wait while competing proposals waste time and money. Alaska is facing an energy crisis, and it must be addressed now. I support the Arctic Fox Natural Gas Pipeline project because it can deliver gas in a reasonable amount of time, reduce energy costs, provide investment opportunities, and stimulate Alaska's economy.
